

GS Italia

Give Italia is the youngest company of the group Give-Total Wind, world leader in the field of transport, lifting and installation of wind turbine. It was born in 2007 and in less of two years Give Italia has distinguished itself on the Italian territory for competence, reliability and ability to satisfy an increasingly demanding customer.

In the Siemens wind mill site in San Gregorio Magno, that it is considered one of the more difficult by the experts in the field, it had been transported and erected 17 turbines between April and June, this is the real proof that there aren't impossible challenges for Give.

Relying on their tractors and trailers of the latest generation, that are built ad hoc for transport of the various components that make up the wind power generator and cooperating with serious and reliable local partner, Give can overcome several obstacles that normally comes in the implementation of complex projects such as wind mill sites are.

Thanks to its drivers and qualified personnel, Give gives to its customers a complete and safe service both for exceptional transport and normal, both for management of turnkey offers together with Total Wind partner, an operating multinational in the world equipped with cranes designed specially for the lifting and wind turbines.

Give Italia has participated for the second consecutive year to ZeroEmission Rome, considering the success of the last year and it aims to consolidate the role of privileged interlocutor for all companies that produce wind turbines.

The future projects include the expansion in North Africa and Eastern Europe, strong growth on markets, where Give is laying the foundation for a lasting and stable staying.
